FÉLIX GRANDET

IMT ATLANTIQUE ENGINEERING STUDENT - APPRENTICE AT ENEDIS LABS

CONTACT

flx.grdt@proton.me

https://portfolio-react-ashen-mu.vercel.app/

TECHNICAL SKILLS

- Languages: Python, C/C++, Java, SQL, HTML/CSS.
- Infrastructure & Cloud: Cloud Deployment, Network Administration, Containerization.
- Cybersecurity: Encryption (AES), Network Auditing, API Security, Bastion Configuration.
- Data & AI: Deep Learning, Database Management.
- Platforms: Microsoft 365 (SharePoint, Excel, Azure).

LEADERSHIP & EXTRACURRICULAR EXPERIENCE

President of the Student Board (IUT2 de Grenoble)

- Managed a 6-person team and oversaw a €50,000 budget to organize events gathering 300 students.

Co-Head of the Investment Fund Club (UQAC - Canada)

- Managed a $250,000 CAD asset portfolio, delivered investment pitches (buy/sell), and led strategic monitoring of disruptive sectors (AI, Aerospace, Cryptocurrencies).

PROFESSIONAL EXPERIENCE

- **Enedis Labs - Smart Grid Project Manager** — OCTOBER 2026 - 2029
  Development and management of AI projects applied to the smart grid sector.
- **Tivoly (Peugeot) - Systems and Network Technician** — APRIL - JUNE 2025
  - Deployment of a bastion host ensuring secure access to the company's information system.
  - Creation of automation scripts (Python & Shell) enabling the cloudification of the file server and the optimization of supply chain workflows.
- **Thalès** — JUNE 2019
  Shadowed professionals in team management, development, testing, and cybersecurity, and observed Agile/SCRUM methodologies.

TECHNICAL & ACADEMIC PROJECTS

- **Trading Infrastructure Development (Python / API)**
  Designed market making and algorithmic trading bots integrated with the Polygon blockchain and Coinbase, requiring strict management of confidential data.
- **CryptBox & Cassiopea (Python, Networks, Encryption)**
  Implemented AES and HMAC encryption algorithms and designed a secure communication network infrastructure for interconnected machines.
- **Kraken Redemption (Gamejam)** — 2nd place
  Prototyped and developed (C++) a software project within a team under strict time constraints (48 hours).
- **PhareAway (Next.js, React, SQLite, Agile)**
  Led a team of 6 developers to deliver a web application promoting French heritage, covering the entire scope from database design to user interface.

EDUCATION

- **IMT Atlantique (Brest Campus)** - Engineering Degree (Apprenticeship), Computer Science, Networks, and Telecommunications — 2026 - 2029
- **Université du Québec à Chicoutimi (Canada)** - International Exchange (AI, Cybersecurity, Economics) — 2025 - 2026
- **IUT2 de Grenoble** - Bachelor of Technology in Computer Science (BUT), Secure Application Deployment — 2023 - 2026
- **Lycée du Granier** - High School Diploma (Baccalauréat), Honors (Mention Bien) - Majors: Mathematics, Computer Science, Earth and Life Sciences — 2019 - 2023
