FÉLIX GRANDET

ENGINEERING STUDENT AT IMT ATLANTIQUE
SEEKING AN INTERNATIONAL INTERNSHIP IN AI & CYBERSECURITY
9 TO 12 WEEKS, FROM MAY 10, 2027

Engineering student and apprentice at Enedis Labs, with a background in back-end development and cybersecurity and a study exchange in Canada. Seeking an international internship as part of my engineering degree, available from May 10, 2027 for 9 to 12 weeks (12 weeks preferred).

LANGUAGES

French: native

English: C1

Spanish: B2

Japanese: A2

TECHNICAL SKILLS

Programming: Python, C/C++, Java, SQL, HTML/CSS, JavaScript

Infrastructure & Cloud: Cloud Deployment, Network Administration, Containerization

Cybersecurity: Encryption (AES, HMAC), Network Auditing, API Security, Bastion Configuration, Wazuh, Zabbix

Data & AI: Deep Learning, Database Management (PostgreSQL)

Tools: Unreal Engine, React, Next.js, Git, Perforce

Platforms: Microsoft 365 (SharePoint, Excel, Azure)

LEADERSHIP

President of the Student Board (IUT2 Grenoble)
Managed a 6-person team and oversaw a €50,000 budget to organize events gathering 300 students.

Co-Lead of the Investment Fund Club (UQAC, Canada)
Managed a CAD $250,000 asset portfolio, delivered buy and sell investment pitches, and led strategic monitoring of disruptive sectors (AI, aerospace, cryptocurrencies).

EDUCATION

IMT Atlantique (Brest Campus) — 2026 – 2029
Engineering Degree (Apprenticeship), Computer Science, Networks and Telecommunications

Université du Québec à Chicoutimi (Canada) — 2025 – 2026
International Exchange (AI, Cybersecurity, Economics)

IUT2 Grenoble — 2023 – 2026
Bachelor of Technology in Computer Science (BUT), Communicating and Secure Application Deployment track

Lycée du Granier — 2019 – 2023
French Baccalaureate with Honors (Mention Bien), Mathematics, Computer Science, Earth and Life Sciences

PROFESSIONAL EXPERIENCE

Enedis Labs - Smart Grid Project Manager (Apprenticeship) — OCT 2026 – 2029
Development and management of AI projects applied to the smart grid sector.

Tivoly (Peugeot) - Systems and Network Technician (Internship) — APR – JUN 2025

- Deployed a bastion host ensuring secure access to the company's information system.
- Created automation scripts (Python & PowerShell) enabling the cloudification of the file server and the optimization of supply chain workflows.

TECHNICAL & ACADEMIC PROJECTS

Trading Bot (Python, API) — IN PROGRESS
Developing a Python bot that applies several trading strategies (moving average crossover, mean reversion), connected to Coinbase and the Polygon blockchain, with strict handling of confidential data.

CryptBox (Python, AES, HMAC)
Built an application for secure file and directory encryption, with HMAC authentication and integrity verification.

Cassiopea (Wazuh, Zabbix, PostgreSQL)
Built a complete network infrastructure from scratch in a team of 5, with core services and network monitoring.

IArio Kart (C++, Unreal Engine, Perforce)
Programmed the navigation of autonomous agents and compared pathfinding algorithms (BFS, DFS, A*) in procedural mazes.

Kraken Redemption (C++, Unreal Engine) — 2ND PLACE
Developed game mechanics in a team of 4 during a 48-hour game jam.

PhareAway (Next.js, React, SQLite, Agile)
Led a team of 6 developers to deliver a web application promoting French heritage, from database design to user interface.
