FÉLIX GRANDET

ENGINEERING STUDENT AT IMT ATLANTIQUE
SEEKING AN INTERNATIONAL INTERNSHIP IN AI & CYBERSECURITY
9 TO 12 WEEKS, FROM MAY 10, 2027

Engineering student and apprentice at Enedis Labs, with a background in back-end development and cybersecurity and a study exchange in Canada. Seeking an international internship as part of my engineering degree, available from May 10, 2027 for 9 to 12 weeks (12 weeks preferred).

LANGUAGES

French: native
English: C1
Spanish: B2
Japanese: A2

TECHNICAL SKILLS

Programming: Python, C/C++, Java, SQL, R, HTML/CSS, JavaScript, PowerShell

Cybersecurity: Encryption (AES, HMAC), bastion hosts, digital forensics (Autopsy), Wazuh, Zabbix

Infrastructure: Network and system administration, Linux, DNS, DHCP, cloud deployment

Data & AI: Neural networks, machine learning, PostgreSQL, Big Data

Tools: Unreal Engine, React, Next.js, Git, Perforce, Jira, Microsoft 365 (SharePoint, Azure)

Methods: Agile, Scrum, project management, GDPR, ISO standards, CSR

LEADERSHIP

President of the Student Union (IUT2 Grenoble)
Led a team of 6 and a €50,000 budget, organizing events from 50 to 300 students, including an integration weekend with six other student unions.

Co-Lead, Innovation & Investment, Investment Fund Club (UQAC, Canada)
Technology watch and buy or sell pitches (P/E, ROI, macroeconomics, financial statements) for a CAD $250,000 stock portfolio, in a 30-member club.

University Esports (UQAC)
Selected for the main League of Legends team.

EDUCATION

IMT Atlantique (Brest Campus) — 2026 – 2029
Engineering Degree (Apprenticeship), Computer Science, Networks and Telecommunications

Université du Québec à Chicoutimi (Canada) — 2025 – 2026
International Exchange in Computer Science and Mathematics

IUT2 Grenoble — 2023 – 2026
Bachelor of Technology in Computer Science (BUT), track B: Communicating and Secure Application Deployment

Lycée du Granier — 2019 – 2023
French Baccalaureate with Honors (Mention Bien), Mathematics, Computer Science, Earth and Life Sciences

PROFESSIONAL EXPERIENCE

Enedis Labs - Smart Grid Project Manager (Apprenticeship) — OCT 2026 – 2029
Development and management of AI projects applied to the smart grid sector.

Tivoly (Peugeot) - Network Administration Intern — APR – JUN 2025

- Deployed a bastion host to secure external access to the information system, after testing in sandbox environments.
- Set up digital forensics tools (Autopsy) to prepare the response to cyberattacks.
- Migrated company files to SharePoint with tested and documented PowerShell scripts.
- Automated supply chain tasks in Python, with error tracking, and trained users in dedicated meetings.

TECHNICAL & ACADEMIC PROJECTS

Trading Bots (Python, API, TradingView, PythonAnywhere) — IN PROGRESS
Designed Python bots (moving average crossover, mean reversion) deployed on a server, running 24/7 on stock and crypto markets.

Cassiopea (Linux, Wazuh, Zabbix, Scrum, Jira)
Elected project manager of a 5-person team; built a secure network infrastructure from scratch, with core services and monitoring.

Stud'Life (Java, Scrum, Jira, GitHub)
Team leader and Scrum Master of a 5-person team delivering an event management application for student associations.

CryptBox (Python, AES, HMAC)
Built an application for secure file and directory encryption, with HMAC authentication and integrity verification.

IArio Kart (C++, Unreal Engine, Perforce)
Programmed autonomous agents and compared pathfinding algorithms (BFS, DFS, A*) in procedural mazes.

Kraken Redemption (C++, Unreal Engine, Jira) — 2ND PLACE
Formed a team of 4 and delivered a working game within a 48-hour game jam.
